Skills

Java, Scala
Spring Boot
SQL
Linux, git
TypeScript, JavaScript
Docker, Kubernetes
FP, OOP
agile
RabbitMQ, Kafka
React, Redux
Clojure, Raku (Perl 6)

Education

Lehigh University '08-'12

B.S. Computer Science/
Engineering

Functional Programming in
Scala – EPFL via Coursera

Secure Code Warrior Cert.

Organizations

Philly Java User Group
Philly Linux User Group
Philly Area Scala Enthusiasts
Philly Lambda
Lehigh Philosophy Club
Lehigh Debate

Values

Continuous Improvement
Radical Candor
Harmony
Idiomatic Code

Experience

Fiserv

Senior Software Engineer   Apr 2024 – Jan 2026
- Rewrote legacy Cardpointe app to modern Spring Modulith
- Pivoted from microservices to modular monolith architecture
- Mentored junior-biased team with thorough code reviews
- Corrected misconceptions around modularity, coupling, asynchrony, microservices, and Event Driven Architecture
- Created Kubernetes CustomResourceDefinition and Operator for IDP with JOSDK
- Maintained consistency among microservices with custom Spring Initializr instance and Spring Boot Starter libraries
- Created sophisticated git strategies for monolith decomposition and microservice rehydration
- Demonstrated Data Oriented Programming for clean, testable code

Envestnet

Software Engineer II   Jun 2021 – Dec 2023
- Developed microservices for NGT trading backend
  - Spring Boot, Postgres, Kubernetes, Kafka, Redis, Lombok
- Maintained legacy UMP Application – Turnkey Asset Mgmt Platform
- Wrote tests across the spectrum of unit, functional, integration (with TestContainers), contract and characterization tests with concise, readable, precise and robust fluent style assertions with AssertJ
- Internalized Spring Boot idioms: DI, config, Actuator, Events
- Learned Jackson the hard way
- Verifiably improved performance by composing `CompletableFutures`
- Graduated React Bootcamp (among 17 graduates out of 60 inductees)

Wingspan, an IQVIA Company

Senior Software Engineer   Jan 2019 – Jun 2021
- Maintained Electronic Trial Master File Application
  - Scala, Java, PostgreSQL, TypeScript, React
- Designed and developed *Deployed Application Facilitation Tooling*

T.S. Partners, Inc.

Software Developer   Oct 2013 – Jan 2019
- Developed Java SE 8 web back-end witfh Oracle SQL
- Built numerous meta-programming utilities to increase developer productivity (utilizing Java Reflection API)
- Implemented OOP abstractions for many common operations
- Spearheaded Linux Project Management KVM server
  - Ubuntu, Redmine, Jenkins, Gitlab, libvirt, SonarQube, Mattermost
- Exemplified Functional Programming in Java 8
- Contributed to homegrown SQL query builder library
- Converted legacy Delphi codebase faithfully
- Consistently reduced code volume by a factor of 3

Presentations and Projects

Collectors by Induction | The Stateful Consumer Pattern | Paraprogramming | Raku – The Only Correct Language | Tests and Testability and Sea Monsters | String Counting Kata

Touch Grass – Winner 3rd Place (Advanced Category) Drexel Codefest April 2024
